**Northern Lights Generator Sets**

# Clean Power. Clear Air. Complete Comfort.

Need a reliable, simple to use generator set that fits your boating lifestyle? Northern Lights has the solution for you. Supplying 5 to 25kW @ 60 Hz (4.5 to 20kW @ 50 Hz), our sets are designed for the demands of at-sea power production, with minimal maintenance. You take pride in your boat and will want to have a hand in all of your most important systems. See how the power production solutions from Northern Lights allow you to spend more time on board, and less time in the engine room or at the repair dock.

- Based on reliable, heavy-duty Luger engines, Northern Lights sets produce power at low torque RPM - ensuring long life.

- Our custom marinization includes a cast-iron liquid cooled exhaust manifold, cupro-nickel heat exchanger and gear-driven sea water pump - all to ensure long term dependability in the unforgiving marine environment.

- Our revolutionary base frame design integrates the sound enclosure into a quiet, compact power production package. Platform vibration mounts are standard. Add compound mounts for even greater vibration isolation.
